

*Expert pool: Knowledge resources*

Applying learning technologies and tools for creating and using KR in online courses: A Guide for educators and researchers.

Wednesday 14 September: 09.00 – 10.30 (CEST)

By: Christos Rodosthenous (Open University of Cyprus)

### **Short introduction**

Currently, there is a plethora of Distance Learning courses available for learners. These courses are part of University programs, vocational training programs, independent courses or Massive Open Online Courses (MOOCs). The structuring and building of such a course is a process that requires time and effort and educators need a number of skills for preparing content and activities.

### **Goal of online event**

Provide insights to educators and course creators for understanding the possibilities and available tools for building online courses.

### **Abstract**

The scope of this webinar to facilitate educators for building an online course using knowledge resources (KR) and activities. We will focus on tools that can be used for building such a course and tools for creating KR and add them in an online course. Moreover, viewers will have the opportunity to watch a live demonstration using a demo course created in the Open University of Cyprus eLearning Platform.
